Karl Storz Endoscopy Workshop
Get the most out of your flexible endoscope

Date: 6 September 2014
Professional Development: 7 CPD points
Venue:
University of Melbourne, Faculty of Veterinary Science
Veterinary Hospital
250 Princes Hwy, Werribee, VIC, 3030
Parking available

Are you getting the most value from your endoscope?
Do you regularly perform oesophagoscopy and gastroscopy as part of your GI work-up?
Do you take biopsies?
Specifically designed for the busy small animal practitioner, this hands-on workshop aims to improve your skills in flexible endoscopy - from selecting the best equipment to improving your technical knowledge and expertise.

Equipment for the endoscopy workshop is kindly provided by Karl Storz Endoskope.
Karl Storz is renowned for the production of medical instruments and devices, with an international reputation for innovation and manufacture of quality products.
CONFERENCE PROGRAM:

8:30 - 9.00am - Registration

MORNING LECTURES:

9:00 - 9.30am – Indications and clinical utility of GI endoscopy.
9.30-10.30am – Equipment selection: what do you need in clinical practice to do GI endoscopy well?
10.30-11.00am – Morning Tea
11.00-11.45am – Oesophagus and stomach endoscopy: techniques (including biopsy and foreign body removal) and case examples.
11.45-12.30pm – Crossing the pylorus: how to, and how to obtain good quality biopsies.
12.30-1.30pm – Lunch

AFTERNOON WET LAB:

1:30-5:30pm - Practice what you’ve learnt including:

- Upper Gastrointestinal demonstration, proper endoscope handling.
- Oesophagoscopy & Gastroscopy, focusing on traversing the pylorus.
- Biopsy demonstration techniques for stomach and duodenum.
- Foreign body retrieval exercises.
- Wrap up with a Q & A session on scope and ancillary instrument care.

CONFERENCE COST

$1600

Costs are inclusive of GST and cover course notes provided on USB, the practical workshop and catering.

Associate Professor Caroline Mansfield graduated from Murdoch University and worked in mixed animal and small animal practice in Australia and the UK before completing a three-year residency in small animal medicine at University College, Dublin. She developed an interest in gastroenterology during that time and has continued that clinical and research interest since her return to Australia in 2001.

Professor Mansfield is board certified in internal medicine, successfully gaining a Diploma of the European College of Veterinary Internal Medicine in companion animals in 2001 and her PhD in 2012. Caroline is active in the Australian and New Zealand College of Veterinary Scientists, currently president elect.

From 2001 until 2010 she was employed at Murdoch University. She moved to the University of Melbourne to become the Hill’s Senior Lecturer in Small Animal Medicine in late 2010, and is currently Associate Professor and section head of Small Animal Medicine.
