The Master of Veterinary Medicine (MVM) is a distance learning Master-level programme offered internationally. It is known for the excellence of its lecturers and the in-depth nature of the courses offered. Veterinarians who have a veterinary degree equivalent to Massey University’s Bachelor of Veterinary Science (BVSc) (see list on MVM website) can study in the programme.

Enrolments are open for courses starting on 14 July 2014. There is time to enrol, please be quick as places are filling fast.

Equine and epidemiology have been added to our offerings this year, in addition to the companion and production animal courses previously offered. Courses starting in July are:

**Companion Animal**
- Canine and Feline Gastroenterology  Bill Rogers DVM DipACVIM
- Clinical Pathology in Small Animal Practice  Mary Anna Thrall BA DVM MS DipACVP
- Diagnostic Imaging for Small Animal Veterinarians  Donald E Thrall DVM PhD DACVR
- Cardiorespiratory Medicine for Small Animal Veterinarians  Gil Jacobs DVM DipACVIM(cardiology)

**Epidemiology:**
- Principles of Veterinary Epidemiology  Naomi Cogger BSc (Hons) PhD

Please note: This is a one semester course running from July to November.

NEW!!  Short online veterinary courses in 2014

Advance your knowledge and enhance your job satisfaction by studying short online veterinary courses. Use new skills relevant to your everyday practice and gain an edge in future career opportunities.

These 12-week, 50 hour short courses focus on a defined area of veterinary practice to bring you in-depth learning on the latest topics with less time commitment that our regular MVM 15 credit courses.

All short online courses are fully assessed and each course can contribute five credits towards the MVM degree.

Short online veterinary courses starting July 2014:
- Multimodal Management of Canine Osteoarthritis  Steve Fox MS, DVM, MBA, PhD
- Introductory Animal Health Investigation  Daan Vink DVM, PhD (Epidemiology)
- Business Communication for Veterinarians  John Bell BA (Hons), BCom, DipGrad
- The Fundamentals of Companion Animal Nutrition  Nick Cave BVSc, MVSc, PhD, MANZCVS, DipACVN

Feedback from MVM students:
- I now feel much more confident at performing clinical exams
- Enjoying the MVM papers to keep my knowledge current and learn new skills from very experienced clinicians.
