## **Introduction**

### **Soi Dog = Street Dog**

The Soi Dog Foundation is a volunteer and non-profit organization with the aim to better the lives and living conditions of the street and stray dogs in Thailand. The most important tasks, the physical work of helping the street and stray dogs, is done in Thailand by volunteers. Soi Dog Foundation supports this work through efforts of volunteers working in The Netherlands with people who donate their time, effort and often much of their own funds.

## **Mission of the Soi Dog Foundation**

To contribute to solving the plight of the street and stray dogs as well as feral cats in Thailand by:

- 1) Efficient and humane sterilization programs with cooperation of local veterinarians, visiting veterinarians from Thailand and abroad (The Atigaro Project) and residents, both local and expatriates.
- 2) Boarding and treatment of sick and injured animals.
- 3) Feeding of street dogs in various locations, e.g. local temples.
- 4) Education programs for local children and adults.

Soi Dog Foundation is a legally registered foundation in The Netherlands.

We are presently in the process of taking the legal steps in Thailand to achieve the same and will keep you posted.

\*\*\* NEEDED \*\*\*

EXPERIENCED VOLUNTEER VETERINARIANS on the resort island of Phuket, Thailand.

Not enough local vets and lack of funds and awareness to tackle the huge number of strays cause immense suffering for dogs and cats.

Therefore, Soi Dog Foundation's "Atigaro Project" runs field clinics with visiting vets to perform sterilizations and to work towards a long-term and humane solution to the stray animal population.

Interested?

Have a minimum of 2 continuous years of practical and surgical experience?
