FROM DIAGNOSIS TO DOLLARS
DENTISTRY in Hong Kong Veterinary Practice

Therapon in conjunction with Hills Pet Nutrition and The Hong Kong Veterinary Association is pleased to present the first of our Small Animal Seminars for Veterinarians in Hong Kong.

For more than a decade Therapon has sponsored a series of five Small Animal Seminars for veterinarians in Australia per year. The aim is to provide a forum for Specialist Surgeons to share their knowledge and experience with veterinarians in local practice.

Since working with the veterinary industry in Hong Kong it has been Therapon’s goal to provide a Continuing Education benefit. And, thanks to the support of HKVA and the co-sponsorship of Hills Pet Nutrition we are able to fulfil our goal.

Dentistry is rapidly becoming an integral part of vet practice income worldwide and it is for this reason we have chosen it as our inaugural topic.

Our highly respected keynote speaker is Dr David Clarke. David is one of only two Dental Specialists in Australia and has extensive local and international qualifications and experience. David’s three hour presentation will provide lots of ideas on how to turn dentistry into dollars at your clinic.

And to provide a local perspective is Dr Gerry Pahl of Victoria Veterinary Clinics in Hong Kong. Gerry is currently working towards specialist qualifications in this field.

We hope you and your colleagues will have the opportunity to participate in our first Small Animal Seminar in Hong Kong.

Yours sincerely

Trevor Newnes BVSc
Director Therapon
